

# NITRILE GLOVES

When working with animal fats or citrus, you need a long lasting glove that can stand up to the task. Our nitrile gloves are comfortable and extremely durable. Nitrile gloves resist breakdown caused by raw meats, oils, and acidic acids.

Use them when working with raw meats, poultry, and fruit. Nitrile gloves have better chemical resistance than latex or vinyl.

## FEATURES & BENEFITS

- Excellent resistance against a variety of chemicals and animal fats
- More resistant to puncturing than latex or vinyl with much of the same flexibility, strength, and durability
- Comfortable snug-fitting glove designed for optimal dexterity

## FIT & COMFORT
