

FoodHandler®

THE FOOD SAFETY EXPERTS

OVER 50 YEARS OF FOOD SAFETY

BRANDS THAT CHANGED THE INDUSTRY

Over 50 years ago, FoodHandler® was the first company to focus on developing solutions specifically designed for safe food handling. Today, we continue this focus to lead the way in keeping food safe with ingenuity and innovative products for the foodservice industry.

OUR MISSION **JUST GO FEED PEOPLE**

Mercy Chefs is a faith-based, non-profit disaster and humanitarian relief organization. We exist to provide professionally prepared, restaurant-quality meals to victims, volunteers, and first responders in natural disasters and national emergencies, and we partner with existing like-minded organizations to further their mission by providing food service in underserved communities across the country.

VINYL/NITRILE

VERSATILE, RELIABLE, VALUE ALTERNATIVE TO NITRILE

Vinyl/Nitrile Blend Powder Free gloves is FoodHandler's newest product solution in the disposable gloves category. Composed primarily of Vinyl with Nitrile blended in, this new innovative glove offers performance advantages from both materials. Experience the ease of donning, improved dexterity, comfort and elasticity. With versatility across multiple markets and applications, Vinyl/Nitrile Blend Powder Free Gloves are ideal for multiple tasks.

- Offers versatility across multiple markets and applications
- Common applications include food preparation, serving foods, catering, and general housekeeping
- Great value alternative to Nitrile and upgrade to standard Vinyl
- Reliable Latex alternative

SYNTHETIC / HYBRID

VINYL | POLY | RECYCLABLE

GREEN INNOVATION

WHAT'S A HYBRID?

Hybrids combine Poly with a synthetic additive to create a glove that performs at a premium when compared to traditional Poly Gloves. Hybrids also provide a value-added and cost effective option for Vinyl Gloves, where applicable, in an operation.

Our Textured Blue Hybrid and the Cast Poly Hybrid are both excellent performing gloves with green benefits over Vinyl, along with excellent stretch and comfort and premium grip performance. Food preparation, sandwich making, taco assembly, wrapping and serving foods, supermarket deli and bakery, and general foodservice use are some common applications for Hybrid Gloves.

HYBRID GLOVES ARE A TOP INNOVATIVE AND VALUE CATEGORY IN FOODSERVICE. **FOODHANDLER® HAS BEEN THE MARKET INNOVATOR AND PIONEER SINCE 2009.**

FoodHandler® TEXTURED BLUE HYBRID

- Innovative synthetic poly hybrid blend
- Textured pattern for improved grip and performance
- Blue color offers higher visibility for food safety
- Improved stretch, comfort and dexterity over vinyl and poly gloves
- Overall upgrade in performance versus poly gloves
- Ideal for food assembly and serving needs such as sandwich and salad making, delis, service stations in schools and supermarkets

JobSelect from FoodHandler CAST POLY HYBRID

- Poly gloves with advanced hybrid technology
- Excellent stretch and dexterity
- Maximum value within the category
- Textured gloves for common foodservice applications such as food serving and food preparation

FoodHandler®

AMBIDEXTROUS
DESIGN

TEXTURED GRIP

SINGLE HAND
QUICK CHANGE

POLY GLOVES

Poly gloves are best when you need to change gloves often while performing tasks that do not require high levels of dexterity.

Economical poly gloves work well for tasks like sandwich making, pre-portioning meats and cheeses, or at the service counter.

FoodHandler®
QUICKFIT® POLY 

- Unique design and innovative dispensing system permits quick, single handed glove changes
- Ideal for tasks requiring frequent glove changes
- Ambidextrous
- Compatible with QuickFit® Wall Mount Bracket: 11-050

GLOVE USE

1 SAFETY

Protection: Gloves are often worn to protect the hands from potential harm or injury. This could include protection from sharp objects, chemicals, extreme temperatures, or rough surfaces.

Safety: In some professions or activities, gloves are a necessary safety precaution. Construction workers, mechanics, and laboratory technicians, for instance, wear gloves to safeguard against potential hazards such as cuts, burns, or exposure to hazardous materials.

PICK A CONTRADICTIONARY COLOR TO FOODS...

WHY? Contradictory colors are easier to spot in the event of glove failure. Using a knife? You could nick the glove resulting in a piece of glove in the food product. Spot it easily with a contradictory color choice.

2 FUNCTION

Comfort: Gloves provide comfort and protection by providing a barrier to direct contact when working with cold or hot foods. Gloves can soothe, chill or provide warmth in certain conditions.

Hygiene: Gloves can be used to maintain hygiene standards. Food handlers use gloves as an extension of their hand washing program. Working with foods means cleanliness is crucial. Wear gloves to prevent the spread of germs, bacteria, or other contaminants.

FoodHandler® glove racks and dispensers help to increase the speed of service. These innovative, but simple and easy to use wall mounted dispensers are quickly installed for convenient accessibility.

FoodHandler® WIRE GLOVE RACK

- Coated metal wire rack
- Fits most standard size glove dispenser boxes

COLOR & MEANING

3 BRANDING

Match Your Brand: Match your gloves with your logo or branded color scheme.

Extend The Experience: Gloves are an extension of your uniform and overall food safety program. Match your logo colors, interior design or staff uniforms. Take it to another level with the look of safety.

4 STYLE

Food Safety Looks Good On You! Black is the trending color. Everything looks good in black, including you!

Compliment With Color: Have an all black or white uniform? Call out food safety with a complimentary or contradicting color. Pink and Blue look great against black and white and also conveys to your customers you're wearing gloves.

CLEAN IT.
CUT IT.
GRAB IT.
WHATEVER "IT" IS.

JobSelect® industrial strength gloves protect your employees from exposure to potentially dangerous chemicals and products. Many styles are available to keep you covered no matter the job at hand.

BLADEBLOCKER CUT PROTECTION

- Ambidextrous, no-seam design ensures maximum comfort for butchering, deboning, and ice carving
- 7 gauge Spectra fiber protects both the employee and the food
- Cut level 5

oneSAFE® SINGLE GLOVE DISPENSING SYSTEM

The oneSAFE® design makes it easy to grab only one glove at a time. Because the system allows users to touch the glove only at the cuff, the palm and fingers of the glove will not come into contact with the user's bare hands. This new dispensing system provides the modularity and operational flexibility needed for long-term care and other operations.

MedHandler®

PATENTED SINGLE GLOVE DISPENSING TECHNOLOGY

- Meets or exceeds a 2.5 Accepted Quality Level
- No aerosolization or drying of powder on skin with powder free gloves
- Compatible with oneSAFE® acrylic dispensers: 11-1SF1 | 11-1SF3

ONE AT-A-TIME EVERYTIME.

oneSAFE® EXAM-GRADE NITRILE

- Enhanced tactile sensitivity making it the ideal all purpose glove for medical needs
- Pebble texturing provides excellent wet and dry grip
