

# FoodHandler®

## DO YOU KNOW WHAT IS ON A FOOD SERVICE EMPLOYEE'S HANDS?

The year 2017 recorded **841** foodborne disease outbreaks.

# 14,481

From those recorded outbreaks, 14,481 illnesses were reported **WHICH REQUIRED 827 HOSPITALIZATIONS**

Every year, the CDC reports new foodborne disease outbreaks caused by food handlers in retail food service establishments who practice poor hand hygiene and improper use of gloves<sup>1</sup>.

ultimately resulting in several deaths and product recalls.

RECALLS

# 150

A typical hand surface before hand washing has **150 DIFFERENT TYPES OF BACTERIAL SPECIES<sup>2</sup>**.

Food workers' hands can be easily contaminated during food preparation but often have many germs even before they come to work<sup>3</sup>.

Hand washing is important, but not always effective, making gloves the last defense against cross contamination by hands<sup>4</sup>.

BEFORE

&

AFTER

# 33%

of test subjects had **YEAST** on their hands after washing hands.

# 94%

of test subjects had **BACTERIA** on their hands after washing hands.

The oneSAFE® cuff first single glove dispensing system decreases cross contamination by **96%<sup>5</sup>**.

Make glove use easy and part of the food service culture. Never allow bare hand contact with ready to eat foods.
